SHEET METAL WORKER

What They Do:

Sheet Metal Workers work with ferrous (steel), non-ferrous (aluminum, copper) and alternative materials (plastics, fiberglass, phenolic board). They fabricate, install, maintain and service components in Heating, Ventilating and Air Conditioning (HVAC) systems. This includes air handling equipment, ductwork, duct system components and the drawings for shop fabrication & field installation. They also perform the Testing, Adjusting and Balancing (TAB) of the complete HVAC system.

Sheet Metal Workers fabricate, install, maintain and service components used in industrial applications. This includes dust and fume collection systems, machine guards, spray booths and ovens. Sheet Metal Workers also fabricate, install and maintain components used in architectural applications. This includes metal roofing, siding, decking, coping, flashing and decorative materials. So you can see that Sheet Metal is a multifaceted trade.

Working Conditions:

Work is done both indoors and outdoors in varying environmental conditions. In the shop, sheet metal components are laid out on flat sheets, formed and assembled (fabricated). In the field, sheet metal components are installed per the job plans and specifications. The trade requires the physical ability for lifting, carrying and installing the components. Since field installation is done off ladders, scaffolds and powered man lifts, sheet metal workers must be comfortable working at various heights. Many job functions require the use of hand or power tools. Sheet Metal Workers should enjoy working with their hands, think for themselves and have the ability to be productive without constant supervision.

Qualifications:

- Must be at least 18 years of age
- Must have the physical ability to perform the work of the trade

Application Requirements:

- Must have a high school diploma or GED
- Valid Driver's License, Birth Certificate, SS number
- Oral Interview with 2 or more trustee representatives
- Pass drug test, background check and Join *SMART LU#24*

Apprenticeship:

- 4 year program
- Minimum of 6,000 hours on-the-job training (OJT)
- Minimum of 225 hours of related technical instruction (RTI) per year
- Probationary Period of 1 year (2,000 hours OJT and 1 year RTI)
- Indentured to the Columbus Sheet Metal Workers Apprenticeship and assigned to a signatory sheet metal contractor
- College credit received from Columbus State Community College

Job Opportunities:

After completing their apprenticeship, journeypersons may continue their training and specialize in welding, service, TAB, CAD (detailing) or other sheet metal specialty. Sheet Metal Workers may advance to supervisory positions (foreman, superintendent, project manager). They may also become an HVAC Inspector, a JATC instructor or open their own business as a Sheet Metal or Mechanical Contractor.

Sheet Metal Workers JATC Four Year Apprenticeship

Apprentices will work a 40-hour typical week doing sheet metal work.

- The JATC will place all apprentices at a sheet metal contractor.
- Most work is in and around the Columbus area.
- We do some jobs in surrounding communities.
 - Marysville, Delaware, Newark, Circleville, Lancaster, etc.
- As an apprentice you will always work close enough to make it to school on time.
- Each apprentice will receive College credits with Columbus State

Apprentices go to school 75 nights each year (3 hours each night 6-9pm)

- 60 nights are shop and classroom, 15 nights are strictly welding.
- School typically goes from August to April.
- 2 nights a week for half and 3 nights a week for half.

HOW DOES IT PAY, ARE THE BENEFITS ANY GOOD?

Assuming you work a 40 hour week (some companies expect you to work overtime).

<u>WAGES</u>	<u>1st</u>	<u>2nd</u>	<u>3rd</u>	<u>4th</u>	<u>JY</u>
Hourly on Check	\$14.00	\$16.80	\$19.60	\$22.40	\$28.00
Weekly on Check	\$560	\$672	\$784	\$896	\$1,120
Yearly on Check	\$29,120	\$34,944	\$40,768	\$46,592	\$58,240

Wages with our great benefits

Hourly W/Benefits	\$23.66	\$32.81	\$39.02	\$43.39	\$52.14
Yearly W/Benefits	\$49,213	\$68,245	\$81,162	\$90,251	\$108,451.00

With benefits over \$100,000 per year, just working 40 hours a week
